Tormess is slowly responding on clean pitches and is too slippery on dusty pitches. The materials look and feel cheap in hand, but do a decent job on foot. Many sneakers had a problem with the fit, especially the room box on the oshs was problematic. The highlight of Pro Bounce 2019 is a well-balanced bounce cushion that provides a great mix of court feeling, responsiveness and protection from impact. In general, this shoe is not recommended by experts - there are much better shoes out there for \$110.
